

*Keep moisture and dirt outside
with the new Brossguard® Plus*

BROSSGUARD® PLUS

Did you know that the biggest cause of damage or wear and tear to your floors is dirt and water?

By choosing the right doormat, you can avoid many of these problems, making it easier to maintain your floor and considerably increasing its life!

Verimpex is introducing a most effective entrance mat.

Following extensive research in association with Ghent University, Verimpex is introducing a new efficient floormat with brush profile, the Brossguard® Plus. This mat makes use of our patented water-drain technology and ensures maximum moisture absorption and drainage. Thanks to the use of sturdy and durable materials, it is also long-lasting.

Moreover, the aesthetic aspect of the Brossguard® Plus has been taken into consideration too. The mat is available with or without aluminium profiles and in every colour, shape or size. In this way, there is a suitable Brossguard® Plus mat for every situation (heavy or little traffic, inside or outside, ...).

BROSSGUARD® PLUS

Verimpex has developed two types:

type 1 **Brossguard® Plus PROFESSIONAL**

Thanks to the use of aluminium profiles, the Brossguard® Plus Professional can withstand maximum pressure. This mat is designed to cope with heavy rolling stock (e.g. forklift trucks) or heavy traffic (e.g. supermarkets). What's more, it is temperature-resistant and not prone to shrinking or expanding due to extreme circumstances. Needless to say, the new, patented water-drain technology has been applied to the Brossguard® Plus Professional, equipping the mat with the best possible moisture drainage system.

type 2 **Brossguard® Plus PRESTIGE**

The Brossguard® Plus Prestige has been developed using rounded pvc profiles, which remove dirt effectively and allow the mat to be rolled up without effort.

Obviously, the mat also uses the unique water-drain technology. These benefits turn Brossguard® Plus Prestige into an exceptionally suitable mat for daily use (in houses, shops or professional practices, for example).

BROSSGUARD® PLUS

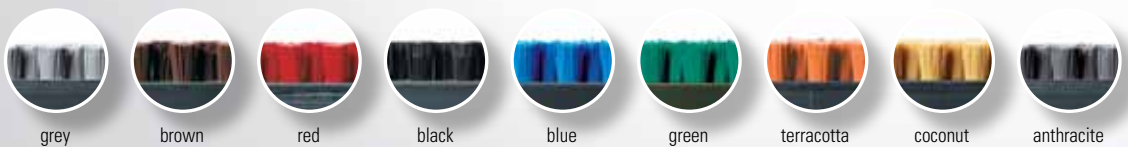

1

Brossguard® Plus PROFESSIONAL

- The Brossguard® Plus Professional is made up of a number of profiles with brushes, which are especially protected with an aluminium profile. These brushes are attached with a steel cable that runs through the profiles.
- The aluminium profiles boast a protruding rim. This rim acts as an extra scraper to remove and dispose of dirt and moisture. The profile has rounded edges that allow water to drain faster.
- A spacer leaves a gap of 4 or 8 mm between the profiles, allowing water and dirt to fall through it.
- The profiles into which the brushes are inserted consist of recycled pvc and are hollowed inward.
- The end of the inserted brush bundles connects to the hollow in the profile.
- Needless to say, the Brossguard® Plus Professional can be personalised: we can varnish the aluminium profiles in a colour, and the brush colour can be chosen from the selection below.

Available brush colours:

Tests in accordance with European standards

The Brossguard® Plus is a patented product and has been extensively tested.

The positive results for all these tests, where European standards were used as a basis, bear out the excellent quality of the Brossguard® Plus. They can be consulted on our website www.verimpex.eu.

Warranty

Brossguard® Plus comes with a 10-year warranty against wear and tear of brushes, profiles and colours in the event of a standard use of the mat.

Verimpex develops and manufactures a wide range of maintenance-friendly and top-quality floor mats. Thanks to the large choice of colours, patterns and finishes, every mat can be personalised in accordance with the customers' wishes.
